## COVID-19 asymptomatic testing programme for schools

Dear Parent/Carer,

I am writing to let you know about the Schools/ELC Asymptomatic Testing Programme, which is in place as part of the package of COVID-19 risk reduction mitigations in schools across Scotland, and to give you more information about how the programme operates in our school.

The programme has been extended to cover all secondary pupils and as a parent of a pupil joining us in S1, can I request that you discuss the contents of this letter and the attached privacy notice with them. If you and they are content, please ensure that the online consent form is completed. This can be accessed using this link - [Consent Form](#). This will ensure that your child can participate in testing if he/she wishes to do so.

### Why is our school/setting participating in the programme?

Along with the other protective measures we have implemented to keep our school community safe, regular testing of staff and pupils will help to further reduce risks for staff and children and young people in our school.

It will do so by helping to identify asymptomatic individuals in school environments at the earliest possible opportunity and asking them and their close contacts to self-isolate, thus minimising the likelihood of them passing on the virus.

### Who can take part?

The regular testing is open to all school staff and pupils who are regularly attending the school premises. The testing programme also includes school-aged childcare staff and early learning and childcare staff in settings that are attached to schools. References to 'school staff' within this letter include this wider group of childcare staff.

## Does everyone have to take part?

Testing is voluntary. No-one who is otherwise permitted to come to school will be prevented from doing so just because they do not wish to participate. However, we are strongly encouraging all school staff and pupils who are attending school to participate wherever possible, in order to contribute to the wellbeing of our school community.

However, if staff or pupils are working or learning from home, they should not participate. This is because the programme is intended specifically to reduce risks in the school environment.

## What will the testing involve?

Our school has been provided with a supply of Lateral Flow Device (LFD) test kits by the Scottish Government and the UK Department of Health and Social Care for use at home. We will give each participating staff member and pupil a supply of these test kits to take home, together with the 'Instructions for Use'. Each staff member and pupil will be asked to sign for these in a log at the point of handover. Completion of this test kit log is a regulatory requirement.

We will then ask individuals to test regularly at home, twice a week (ideally on Sunday and Wednesday evenings).

The tests supplied do not require laboratory processing and can provide a quick result in around 30 minutes. Comprehensive guidance on conducting self-testing is contained in the 'Instructions for Use' leaflet which will be provided with the test kit. There is a useful video showing participants how to administer the test here:

<https://www.youtube.com/playlist?list=PLvaBZskxS7tzQYIVg7lwH5uxAD9UrSzGJ>.

Once the test has been conducted individuals must log the test result – whether positive, negative or void – online at [www.gov.uk/report-covid19-result](http://www.gov.uk/report-covid19-result). Tests are free of charge and will be provided by the school.

**NB:** It is important to note that this regular testing is only for individuals without symptoms. Those with symptoms must continue to follow the usual guidance. They must self-isolate and book a PCR test at a test centre or via a home test kit at the earliest opportunity. People with symptoms must not rely on a negative LFD result to continue to attend school.

**NB:** A negative test result must not be taken as leave to relax or ignore physical distancing or other measures intended to reduce transmission – testing is an additional intervention that contributes to reducing risk.

## What happens next?

Please discuss the contents of this letter and the privacy notice with your child. If your child wishes to participate in testing, and you are content for them to do so, please ensure that the online consent form is completed. If you would prefer a paper copy, please contact the school.

Kits can be collected from the school office throughout the school holidays in order that testing can start prior to the return to school after the holidays.

## Notification of a positive test result

There may be occasions when we are alerted first thing in the morning, or last thing at night, of a positive test. This will require the school and the Test and Protect Team to work very quickly to identify close contacts.

Please be aware that you may receive a text/groupcall/phone call in the evening, or in the morning asking you to take steps to isolate your child. It may be, if they have come to school, that we have to isolate them in school and ask that you pick them up as soon as possible. We shall, of course, follow this up with a formal letter.

Isolation as a result of the LFD test is important, and close contacts need to isolate unless the follow up PCR provides a negative result. If close contacts no longer need to isolate, they will be contacted directly by the Test and Protect team.

We will continue to support and communicate with our staff, pupils and school communities as we implement this programme. Please let us know if you have any questions. In the meantime, some Frequently Asked Questions can be found in the annex to this letter.

Yours sincerely,

John Devine  
Headteacher
