

Nursery news

Making Sun Catchers

The nursery children have been collecting a range of natural materials from around the campus. They have learnt the names and talked about the different smells and textures. They mixed them with water and froze them to hang outside to see how long they took to melt!

Outdoor learning

This term we will be continuing our joint outdoor learning with p6 at natures wood. We will also be exploring the Birks to learn about nature in our local environment. This week we played games with the P6 class and collected natural objects to take back to use in our classroom.

Santa Visit

At the end of last term, the nursery had a very special visitor come to the Christmas party and tell us all about what it's like living in the North Pole.

Other Information

We access outdoors in all weather so please send your child in with suitable clothing and both indoor and outdoor shoes.

Below is a link to a questionnaire from our Early Years Family Practitioner regarding what learning and support you would like to see this coming term.
