

Nursery news

Minibeasts

We are still learning about minibeasts and where they live. We have been on bug hunts to the woods and built our own bug hotels. We also have two pet snails, called Fred and Shelly, in the nursery that we are looking after.

Science – With Mr Clark

Mr Clark showed us some experiments up in the chemistry lab. We made lava lamps, made crystals on the Bunsen burner and did some colour changing experiments.

Sgoil-àraich

It's been all about picnics, tea parties and apple trees this week. The children were playing at picnics and so we decided to head to the orchard one morning for a picnic snack. We found lots of apple trees there which the children were keen to sample. We washed them and made apple crumble and have been getting quite creative using fruits to create art.

Other Information

Tempest will be in to take Nursery photographs on Tuesday 6th September.

We are low on spare clothes in the nursery and looking for any donations of trousers age 2 – 5 years.

During messy play activities in nursery we encourage children to wear aprons but we do ask that children come to nursery dressed in suitable clothing that might get messy.
